Hi Annette,

Do you know which address EPA Accura should use as the center for the industrial survey? The meeting summary referenced two:

- The center point of the radius will be either [395 Elm Street](#) or [314 Vine Street](#). Accura will confirm which address to use with EPA before starting this task.

Also, I haven't received the database from the START contractor. TechLaw has staff in its Denver office who can help with the phone calls so I would like to get them started if EPA still needs help with this task.

We can talk about this tomorrow if you're available.

Sincerely,

Julie Green

Julia;

Welcome to the team. I'm cc'ing Katie Wise with Tetra Tech here as she's the one that will have to make the connections in the Geoplatform.

Katie: Can you and Julia talk about the best way to share the access and questionnaire database? Once access is possible, Julia, you, and I (and Annette if you're interested) can talk about what it all means and which properties are still requiring owner research. It should be as simple as a filter of the access database.

Right???
